

# Tuscany Spa

Tuscany is a world of refinement and effortless style, with a premium seat that results in complete comfort. Tactile senses are elevated as this beautifully tailored pedicure spa is matched by performance and effortless control. The Tuscany takes distinctive lines from European Touch's heritage and updates the striking face with a purposeful sweeping C-shaped footrest, and durable easy to clean cultured stone basin. Tuscany incorporates the number one pipe-free Clean Touch technology and the new sweeping footrest while maintaining the nail technician and client preferred gravity chair and automated adjustable ergonomic basin. The esthetically pleasing yet functional leg support allows the clients feet to be perfectly positioned for massage and pedicure treatments. Gone is the strenuous task of supporting the client's leg with one hand while trying to work on the bottom of the foot with the other hand. The result is comfort for both client and technician. Salon options include oversized manicure trays large enough to handle not only manicures, but computers, or even a tea service for the most discerning client.
