

ERGOPRO CHAIR

SPA ACCESSORIES

18 inch wide polyfoam seat cushion is very comfortable. Seat's waterfall front will not restrict circulation in the thighs and knees.

Easy rolling casters.

Adjustable height, telescoping column allows for a multi-purpose stool; designed for manicure and pedicure stations. (Telescoping height range is 16" x 20")

The patented ratchet system on the swing arm allows each technician to position it properly for personalized support and correct posture.

Slide tray is movable and removable.

Unique, adjustable 27 inch long swing arm can be positioned in front of technician for body and arm support, or behind the tech for back support. Can also swing to the side for use as an armrest.

To Assemble:

1. Remove base from the carton and place on the floor.
2. Remove the column from the rolled cardboard insert, and place it into the base.
3. Place the swing arm over the column. Insert the body support into the swing arm and secure at the desired height by turning the adjustable knob.
4. Attach slide tray using the guide found on the underside of the swing arm.
5. Place the open hole in the seat plate over the top end of the column.
6. Apply downward hand pressure to the top to the seat first, followed by sitting pressure to lock the base, column, and seat together.
